

This process will help your company to build a team of internal productivity improvement specialists, certified and recognised by Singapore Productivity Association. You can build the capability to start your own journey of continuous productivity improvement to save business cost and bring in higher profitability.

Profile/Professional Summary

I am a productivity improvement consultant who facilitate productivity coaching and implementation programmes to increase profit and lower costs for businesses. I have over 25 years' experience in Engineering, Manufacturing Operations, Sales & Marketing, Learning & Organization Development, Talent Management & Business Succession Planning, and Business Consultancy.

Professional Consultancy and Advisory Specialization

Productivity Improvement – Specialise in improving productivity of businesses via implementation coaching, and on-site facilitation programmes.

Human Capital Development – Specialise in Performance Management, Talent Management, Training & Development, and Business Succession Planning.

Professional Qualifications

Practicing Management Consultant (PMC) – Certified by Singapore Business Advisors and Consultants Council (SBACC)

eCPP Case Study 1: An F&B company reduced food processing time by 20% even with lesser manpower. It was achieved through the implementation of more efficient food preparation and processing methods, coupled with a few changes in its layout.

eCPP Case Study 2: A retail store reduced stock access time by 60% even with 17% less manpower. It was achieved through the implementation of more effective delivery time schedule and more efficient back-end ordering processes.

3-step Framework and Process

1. Identify and Analyse productivity Issues
2. Develop and implement productivity solutions
3. Enhance business and productivity performance

This is a simple but effective process used successfully by 89 local enterprises who have built their own in-house productivity improvement capability, and its 240 certified productivity practitioners since 2010 by Singapore Productivity Association. They are continuously improving their productivity, increasing their profitability and reducing their costs year after year.

eCPP Programme Overview

1. Business and Productivity Performance Assessment

- A diagnostic approach to assess company's performance and identify areas for productivity improvements
- Establish a company-specific Productivity Roadmap

2. Capabilities in Productivity Improvements

- Acquire knowledge on productivity techniques, tools and methodologies through a combination of in-class and on-site training for entire project team

3. Project Coaching and guidance by a productivity consultant to achieve at least 20% improvement

4. Project Implementation Review to check efficacy of solutions and plan further cycles of improvement
